

We are committed to providing reliable autonomous solar LED street lights with a modern, aesthetically appealing design and exceptional services to our customers.

ABOUT US

Agamine develops, manufactures and distributes high-performance solar LED street lights. Our mission is to provide reliable autonomous solar LED street lights with a modern, aesthetically appealing design. We help our customers reduce their energy consumption and environmental impact.

The company was founded in 2015 by European and Moroccan solar industry and manufacturing experts. Our lighting solutions are developed and designed in Europe. The headquarters is based in Morocco with regional sales partners across many countries.

OUR FACTORY

Our manufacturing plant is located in a 50,000 square meter state-of-the-art facility based in Morocco. Agamine's ISO 9001 certification indicates our commitment to manufacturing and selling high quality products and improving our company, our products and our quality management system.
